

Carbon Management Plan

Path to Zero

Strategic principles and plan for the delivery of a net-zero carbon footprint

Bangor University declared a climate emergency in June 2019, at a time when the Welsh Government acknowledged the challenge of climate change

- b) room and location air conditioning systems. Such units will, where practicable, be replaced by air moving and other building modifications. All existing units will be reviewed between 2022 and 2025 and unnecessary or inappropriate units adapted, removed, or replaced, and from 2025 no new system will be installed without a clear and defensible case for their installation.
6. work with staff, students, Colleges, Schools, Research Teams and Services to evaluate and reduce energy and water use. To aid understanding, the University will:
- a) provide each School and major Service with a breakdown of their energy and water usage.
 - b) promote energy and water
